CLEARDATA®

Managed Services Packages
## Find Your Best-Fit Cloud Solution

With ClearDATA Advanced and ClearDATA Premium managed services packages, you integrate healthcare-focused cloud security posture management (CSPM) software with services—that help you remain compliant, secure, and operationally efficient throughout your cloud journey.

Our packages are designed to facilitate observability—by recognizing, assessing and monitoring security threats in public cloud environments, identifying misconfigurations, facilitating audit-readiness, and relieve pressure on your skilled teams.

ClearDATA CyberHealth™ Platform

Our SaaS CSPM solution continuously manages security posture through prevention, detection, and response to cloud infrastructure risks. It also includes capabilities that make it easier to protect PHI in the public cloud. Add on MDR services to proactively defend against cyber threats.
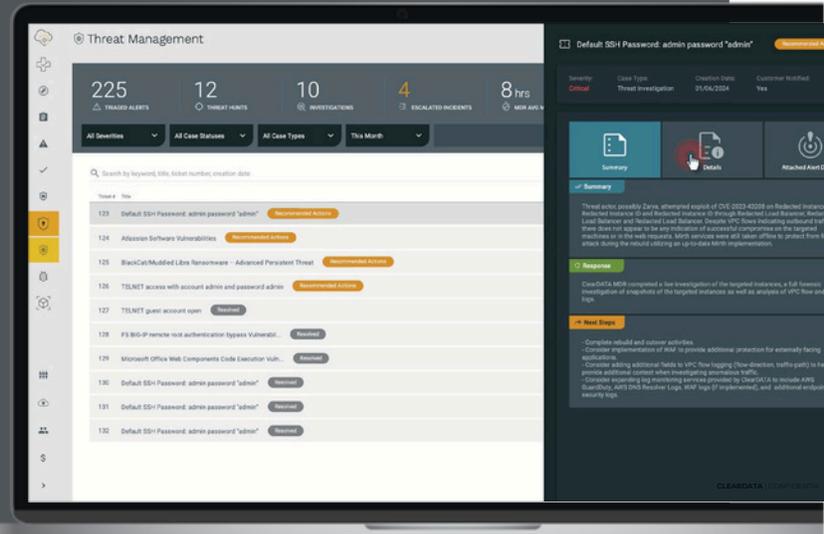

*included in every managed services package

ClearDATA Advanced

The Advanced package includes Managed Compliance services to help you identify configuration risks to your compliance and provide guidance on remediation actions. Engineers are available to provide support and troubleshooting during business hours.

ClearDATA Premium

Premium package offers everything you need to fully manage your environments for complete compliance and security. Building on the services in the Advanced package, Premium offers 24×7 hands-on implementation, configuration, and detection services so you remain in compliance at all times.

ClearDATA Services

Category	Service	Description	ClearDATA Advanced	ClearDATA Premium
Compliance	Managed Compliance	Leveraging the CyberHealth Platform, ClearDATA will work with you to identify compliance issues, advise you on the proper configurations for compliance, and provide documentation on required remediations and automated safeguards. In addition to the services provided in Managed Compliance offer triage, remediation (at Premium level) and help with Compliance Score improvement by the ClearDATA team.	✔	✔
	Hardened Images	ClearDATA offers you a library to build secure and compliant services and applications within common operating systems and platforms across AWS, Azure, and GCP that conform to CIS level 2 benchmarks.	✔	✔
Cloud Operations	Managed Cloud Operations	With Managed Cloud Operations, we proactively confugure, monitor, and troubleshoot cloud infrastructure in AWS, Azure, and GCP environments to minimize operational overhead and reduce risk. Take advantage of 24x7 support for all 200+ services on each public cloud, to ensure they adhere to established regulations, standards and best practices.		✔
Managed Security	MDR Basics	A solid foundation for cloud security, our Managed Detection & Response Basics is powered by our managed XDR platform's compreghensive data analysis. We monitor server security and cloud activity logs and identify endpoint vulnerabilities to protect your infrastructure from threats like malware, ransomware, and credential attacks. Support for native security services like AWS GuardDuty, Cloud Defender, and Security Command Center offer built-in protection for your IaaS and PaaS deployments.		✔

Available Add-On Services

Category	Service	Description	ClearDATA Advanced	ClearDATA Premium
Managed Security	MDR Essentials	Deeper insights and protection from threats targeting cloud-hosted applications. Leverage machine learning and the XDR platform advanced analytics to monitor internet-facing applications logs, and analyze all file, process, and network activity for enhanced detection in server environments. The ClearDATA Team also customizes threat detection based on your specific cloud environments, including Kubernetes and other deployments—ensuring you stay ahead of evolving threats.	Available	Available
	MDR Complete	MDR Complete goes one step futher—delivering the ultimate security experience, combining XDR's power with rapid response and expert guidance. The ClearDATA Team monitors cloud storage access logs, orchestrates malware protection for your cloud storage, and manages custom threat detection rules tailored to your unique IaaS, PaaS deployments.	Available	Available
Managed Compliance	HITRUST Inheritance	ClearDATA works with you to accelerate HITRUST certification assessments using ClearDATA's Compliance Score, optimizing cyber risk management, delivering greater control in public cloud environments.	Available	Available
Cloud Operations	Managed Observability	ClearDATA team uses advanced monitoring tools to detect, analyze, and respond to system metrics, logs, and traces to provide you with a comprehensive view of your cloud environments.	Available	Available
Professional Services	Cloud Modernization	Consulting services built on deep practical expertise to empower your cloud journey with strategy, automation and architecture. Key outcomes may include documentation and clarity around current state and needs/direction, a design and implementation roadmap, efficient development and risk management, and a fully implemented solution with operational enablement and training.	Available	Available
	Data Analytics & Reporting	Providing a full suite of data strategies and implementations to help customers securely derive value from their data assets. Key outcomes may include data, analytics and disaster recovery assessments, phased implementation roadmaps with updated data architecture, a governance model and operational blueprint, data and analytics runbooks, and training, workshops and implementation of new initiatives.	Available	Available
	Staff Augmentation	As you grow in the cloud, ensure your business remains secure and compliant, is armed to combat existing threats, and is prepared to stop what's to come—by experts exclusive to the Healthcare IT industry. Key outcomes may include creation, deployment and management of DevOps platforms and infrastructure as code, database maintenance monitoring and management, custom staff augmentation, and training and enablement.
